

The Next-Generation Environmental OS API-fying Planetary and Health Value

Planetary Health Unified API (PH-API)

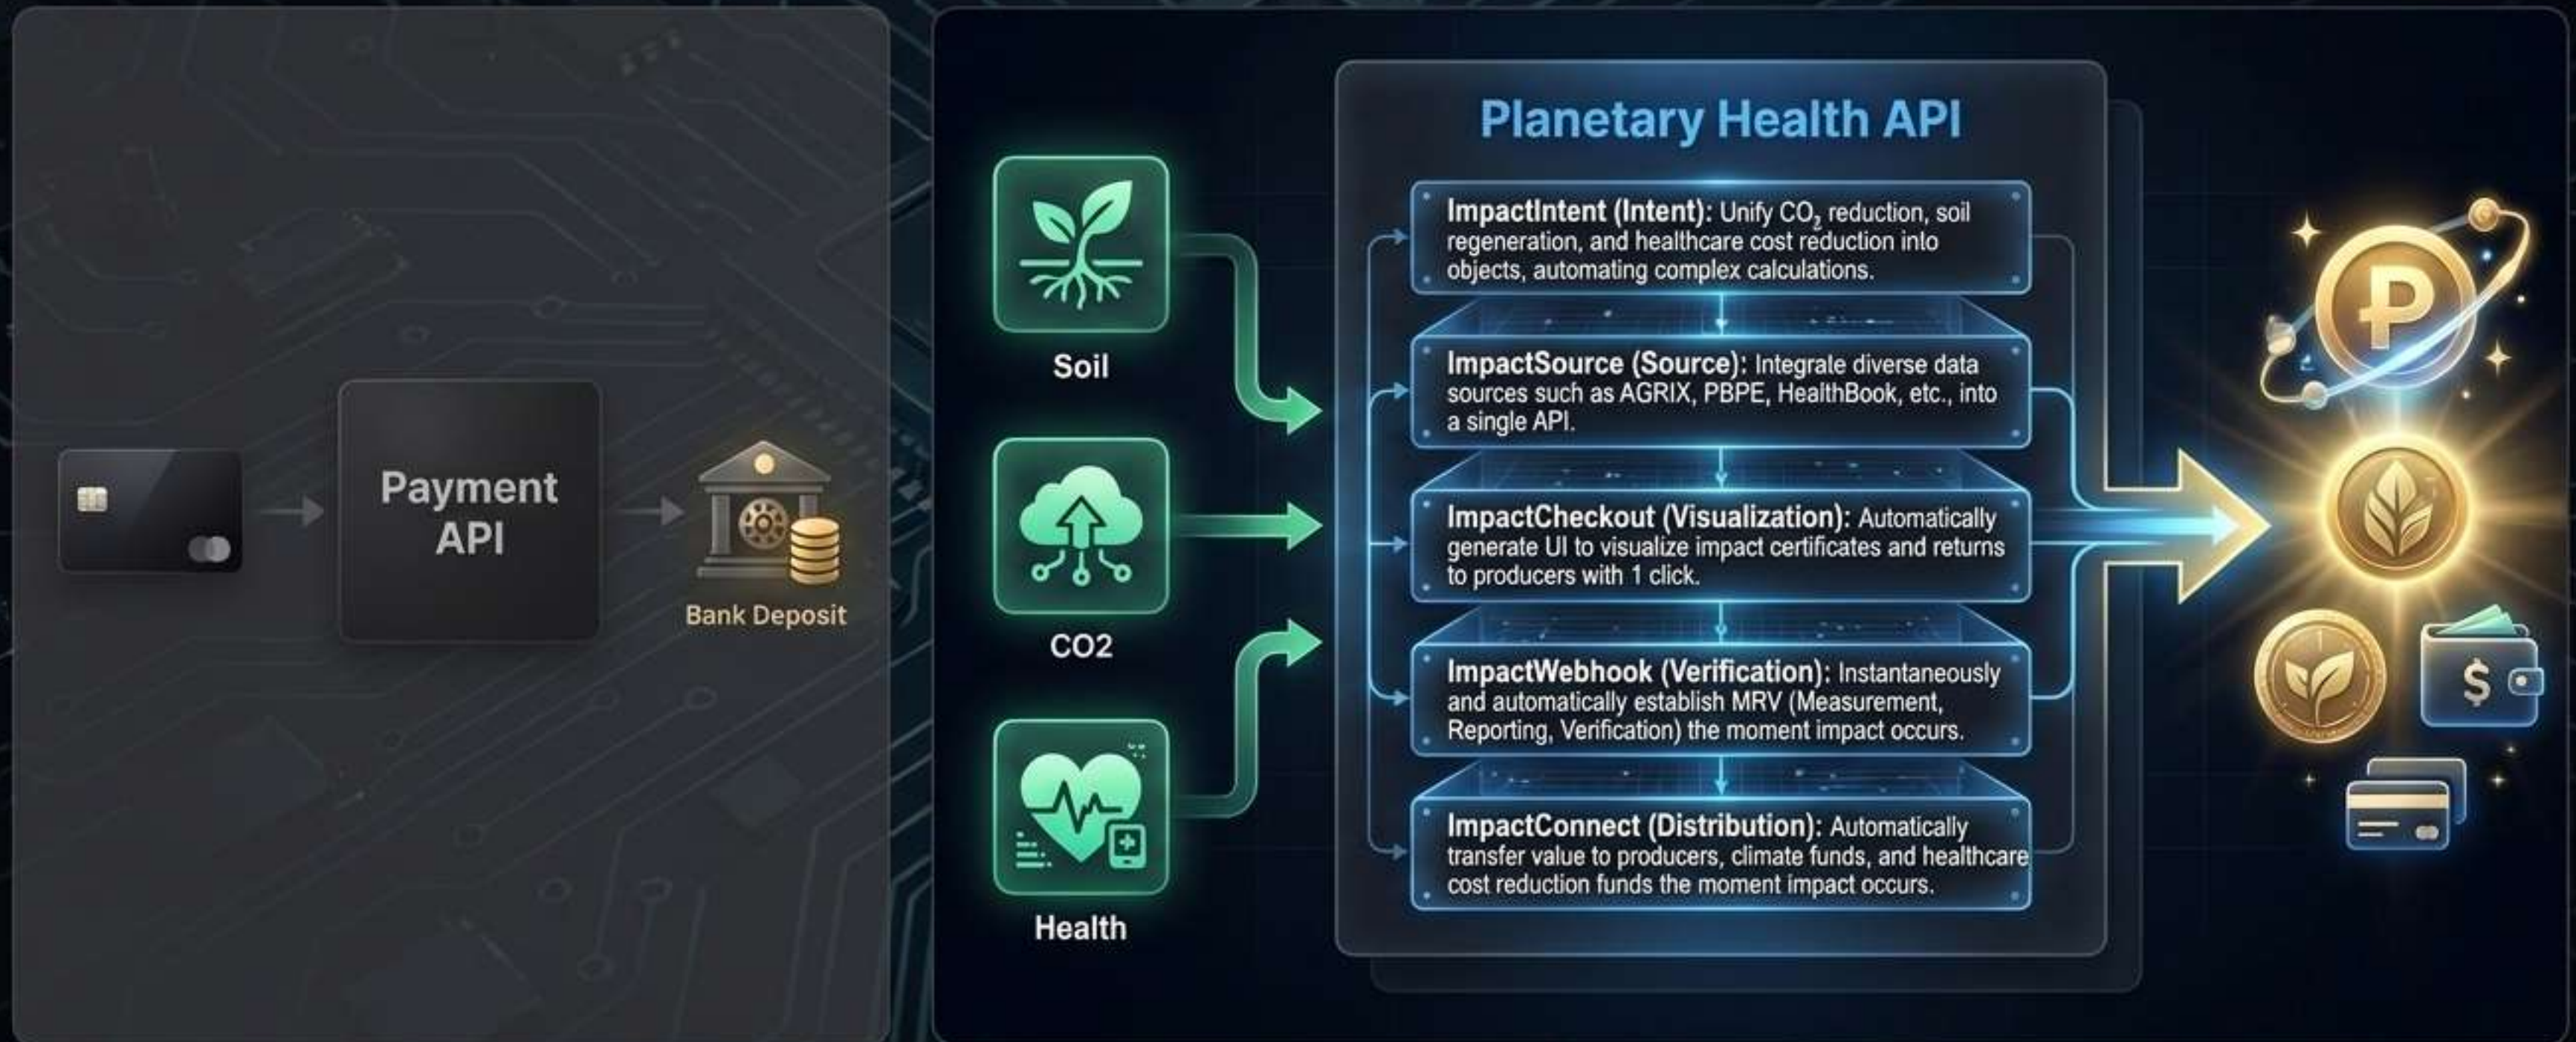

A global standard platform integrating climate, health, agriculture, and finance.

Just as Stripe changed the flow of money, we will revolutionize the flow of planetary and health value.

Mechanism for Instant, Automated Conversion of Impact into Financial Value

Abstracting complex ecosystems into a single layer, making implementation possible with just 7 lines of code.

Self-Propagating 7-Step Economic Cycle: PBPE Value Flywheel

1. Capital Input (Capital Input)

Initial capital inflow from the World Bank and ESG funds.

2. Ecological Regeneration (Ecological Regeneration)

Drastic improvement of soil environment and methane gas reduction through the utilization of MBT55.

3. Productivity Boost (Productivity Boost)

Increased crop yield and quality improvement through AGRIX introduction, gaining green premiums.

4. PBPE Issuance (PBPE Issuance)

Instant tokenization and crediting of impact (carbon, soil, water, health).

5. Value Distribution (Value Distribution)

Fully automated, real-time profit distribution to farmers and climate funds via ImpactConnect.

6. Economic Return (Economic Return)

Astonishingly high ROI in 3.5 months. Increased tax revenue and future medical cost reduction.

7. Reinvestment (Reinvestment)

Generated profits flow back into the system, accelerating the flywheel effect.

A New Marketplace Breaking Through the Limits of Traditional Climate Investment

Comparison Item	Existing Climate Investment	PBPE Marketplace
Nature of Investment	Cost / Donation Sunk costs with unclear financial returns	Profit-Generating Model ✓ Profit center generating certain economic returns
Investment Payback Period	10-20 Years High liquidity risk due to capital lock-up	Approx. 3.5 Months ✓ Overwhelming capital efficiency with ultra-short-term payback
Dimension of Value	Carbon Only Reliance on a single metric	Multidimensional Approach ✓ Composite value of carbon, soil, water cycle, and health improvement
System Structure	No Circulation / One-off Effects cease when the project ends	Powerful Flywheel ✓ Autonomous reinvestment, sustainable growth engine

Instant Value for All Stakeholders Upon Event Occurrence

Instant Impact, Instant Value Ecosystem
